The following is an examiner's statement of reasons for allowance: The prior art fails to disclose and/or teach an auricular prosthesis comprising a tubular body terminating in opposite end flanges. The prosthesis is biodegradable wherein the body portion degrades at a faster rate than the flanges. Such design allows the flange to fall into the outer ear away thereby avoiding mechanical stress on the tissues causing increase risk of invagination and cholesteatoma.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
